Project 31: Rock Creek Curling

Meeting 15 Minutes

Date: Tuesday October 27th, 3:30-4:30 pm
Attendees: Brooke Nelson, Brooke Seifert, Katie Miller, George Bauer, Christian Mesa, Jarron Barret
Missing: *N/A*
Upcoming meetings: Thursday October 29th, 5:00-5:30 pm

Key Discussion Points:

- CV:
    - Moving towards connecting the pieces from last sprint into a pipeline
    - Game state edge cases:
        - Stone is burned (stone will go into the house/frame and be removed)
        - Knockout (stone leaves the frame after collision)
        - Hogged (stone never makes frame)
        - Stone replacement (stone replaces the same color) - similar to hogged
- UI:
    - Fixed database issues
    - Showing user login initials
    - Updated header and footer handlebars
    - Would people be interested tracking single stone position changes from shot to shot, only reason for ID

Major decisions:

- Overall Game with JSON file for each game state given from CV team to UI
    - Includes the
    - { shot_num,
      end_num,
      time,
      camera,
      stone {color, position (coordinates origin on t)}
    - }
    - Will not be passing through identification of stone
- Need to talk to Andy about where to download these images to - server, cost…

Upcoming actions:

- TA meeting on Thursday
